July 2001

## OTCBB Limit Order Protection Pilot To Be Implemented August 1, 2001

**O**n February 8, 2001, the OTC Bulletin Board® (OTCBB) Limit Order Protection Pilot was approved by the Securities and Exchange Commission (SEC). The pilot will become effective on Wednesday, August 1, 2001, and will continue through February 8, 2002, for a select group of 325 OTCBB securities. The securities selected for the pilot were chosen so that the OTCBB can test the effects of limit order protection on a wide range of securities. Two hundred of the most actively-traded securities were included. An additional 100 securities were selected from a cross section of all remaining securities. The remaining 25 securities will be selected on a case-by-case basis after the pilot begins, likely from securities delisted from Nasdaq® or an Exchange. The first phase-in of the pilot will include 200 securities on Wednesday, August 1, 2001. The next 100 pilot securities will be phased-in on Wednesday, August 15, 2001.

In July 2001, the National Association of Securities Dealers, Inc. (NASD®) issued NASD *Notice To Members 01-46* describing the new rule. The Limit Order Protection Pilot will prohibit Market Makers from executing proprietary trades at prices superior or equal to a customer limit order, received from one of their own customers or another firm, without providing “contemporaneous” (i.e., within a maximum of five minutes) execution of the customer’s order. The limit order protection will extend up to the size of the limit order as long as it does not exceed the size of the proprietary trade. No special terms and conditions can be reached with a retail customer to exempt a Market Maker from this rule (although an exception to the terms and conditions clause exists for institutional clients and orders of at least 10,000 shares with a value of at least \$20,000). However, a Market Maker is under no obligation to accept any customer limit orders. Recognizing the potential impact limit order protection could have

upon the OTCBB—a marketplace consisting of diverse securities with varying degrees of liquidity and price—the pilot program will assess the effects this rule has on different tiers of securities within the OTCBB before applying it to the marketplace as a whole. The pilot program will allow the NASD to track the trading patterns of the pilot securities to determine what, if any, effect the OTCBB limit order protection rule has on liquidity, price, and immediacy of execution before establishing a permanent rule.

A list of the initial 300 securities to be included in the pilot and their phase-in dates is provided on pages 2 and 3. All pilot securities will be designated as such with a special character indicator of “##” added to the security name.

If you have any questions regarding the Limit Order Protection Pilot, please contact Jeff Davis, Nasdaq Office of General Counsel, at (202) 728-8461. ■

## Status Update for OTCBB Initiatives

Initiative	Status
OTCBB Limit Order Protection Pilot	Phase-in begins August 1, 2001
Automated Order Delivery System for OTCBB	Proposal submitted to SEC on May 8, 2001
Decimalization	Fully implemented on April 9, 2001
Inclusion of ATS Quotes in Montage	Approved by Nasdaq Board on March 14, 2001

# OTCBB Converted to Full Decimals on April 9, 2001

**O**n April 9, 2001, the OTCBB began quoting and trade reporting in decimals only. Since September 1998, OTCBB participants had been able to use decimals in both quoting and trading; however, some firms chose to continue using fractions. As of April 9, 2001, the OTCBB system no longer allows the input of fractions—it only accepts decimals. There are two minor changes from the way the OTCBB handled decimals prior to the way they are being handled today:

1. OTCBB participants are only able to enter up to four places to the right of the decimal for quotes (e.g., 2.2356) and up to six places to the right of the decimal for trade reports (e.g., 2.235678).
2. When trade reports are disseminated to the media, the Automated Confirmation Transaction Service<sup>SM</sup> (ACT<sup>SM</sup>) reports only four places to the right of the decimal, applying a 5-4 rounding rule (i.e., if the number five places to the right of the decimal is 5 or over, round

up; if it is 4 or below, round down). For example, in the case of 2.235678, it would be rounded and disseminated as 2.2357.

Questions should be forwarded to Greg Wolfgram, Project Manager, at (202) 974-2724 (greg.wolfgram@nasdaq.com). ■

## What's Happening @OTCBB.com

### Site Search

A site search feature was added to the OTCBB website earlier this year. This new addition will enable users to navigate the site and locate information in a more convenient and efficient manner. Site users can access the search engine from the masthead of each page of [www.otcbb.com](http://www.otcbb.com).

### URL

The OTCBB website has introduced the ability to link directly to the websites of OTCBB issuers. By clicking on an issuer's symbol, users are linked to the homepage of the issuer's website. If you have questions about the OTCBB website or would like to provide us with a URL for an OTCBB issuer's website, please email Natalie Howard at [natalie.howard@nasdaq.com](mailto:natalie.howard@nasdaq.com), or call (202) 974-2718. ■
